

MATTHEW PENNINGTON

Cybersecurity and Software Development Student

Sydney, NSW

[LinkedIn](#) | [Portfolio](#) | matthew.pennington101@gmail.com

Professional Profile

Cybersecurity and software development student at Macquarie University. Experience in building mobile and desktop applications, conducting machine learning security research and offensive security testing. Tools used include Python, Flutter and Git Etc. Interested in graduate and junior opportunities where I can gain more experience in security and software development.

Technical Skills

Programming: Python, Dart, Java, SQL, HTML, CSS

Cybersecurity: Kali Linux, SSH, Network Analysis, Offensive / Defensive testing

Tools: Git, Flutter, Firebase, PyInstaller, Virtual Machines

Data and Machine Learning: Pandas, NumPy, Keras. TensorFlow, Scikit-Learn, ROC/AUC analysis

Projects

AluShapes Die Management Application | Python, Excel, PyInstaller

Inventory status and inventory location system, updates and saves excel spreadsheet and allows collaborative use. Implemented at AluShapes by me and used for ease of access for all employees to a complicated spreadsheet.

Membership Inference Security Analysis | Python, TensorFlow, Scikit-learn

Developed shadow-model pipelines using logistic regression. Compared attack performance across K shadow models using ROC curves. Documented security analysis report with evidence under the tested conditions.

Card Mobile Application | Flutter, Dart, Firebase

Card collection, photo Sharing and trading based mobile application. Created as a pseudo social media trading card platform to post specific cards and request trades. Application built with Dart, Flutter and Firebase with CRUD, image storage and login / out features.

Education

Bachelor of Cyber Security

Macquarie University, Sydney | Expected Completion: December 2026

Certificate 3, Information Technology

Wyong Tafe | Completed 2021

Employment

Casual Production Worker 2024 – Present

Support aluminium manufacturing operations. Work with production staff with operational records to locate and track Inventory.

Alushapes, Gosford

Casual Worker 2021 – 2024

Coles, Tuggerah
